Acknowledgements

Nebraska Historic Buildings Survey (NeHBS) projects are administered by the Nebraska State Historic Preservation Office (NeSHPO) with the cooperation of the Nebraska State Historical Society (NSHS). The NeHBS is funded in part with the assistance of a federal grant from the U.S. Department of the Interior, National Park Service. However, the contents and opinions expressed in this publication do not necessarily reflect the views or policies of the U.S. Department of the Interior. Regulations of the U.S. Department of the Interior strictly prohibit unlawful discrimination on the basis of race, color, national origin, age, or handicap. Any person who believes he or she has been discriminated against in any program, activity, or facility operated by a recipient of federal assistance should write to: Director, Equal Opportunity Program, U.S. Department of the Interior, National Park Service, P.O. Box 37127, Washington, D.C. 20013-7127.

Appendix – Surveyed Properties

Survey Methods and Results

Introduction

The City of Lincoln (City) retained Mead & Hunt, Inc. (Mead & Hunt) to conduct a reconnaissance-level survey of all properties located within the proposed Boulevards Historic District, south of Van Dorn Street. This concentration of intact early to mid-twentieth-century buildings was previously identified by the City as potentially eligible for the National Register of Historic Places (National Register). The overall district boundaries were defined by the City to encompass properties bound by South Street in the north, Winthrop Road and Sheridan Boulevard in the east, Woodsdale Boulevard and the Lincoln Country Club in the south, and South 22nd and South 24th Streets in the west. Platted between 1900 and 1917, the proposed district includes a mix of high-style and modest building stock dating from the early to mid-twentieth century. The district consists of over 800 primarily residential properties. The properties south of Van Dorn Street had not been previously surveyed. This chapter describes the methods used to conduct the survey and the results of the survey.

In July 2006 architectural historians from Mead & Hunt completed a reconnaissance-level Nebraska Historic Buildings Survey (NeHBS) of the properties south of Van Dorn Street, within the previously defined historic district boundaries. The survey builds upon previous survey efforts undertaken by the City of Lincoln Certified Local Government (Lincoln CLG), which identified the preliminary boundaries of the Boulevards Historic District. Properties located north of Van Dorn Street had been previously documented. For more information on the NeHBS and Lincoln CLG, see *Preservation in Nebraska*.

Survey methodology

The purpose of a reconnaissance-level NeHBS is to provide data on properties of architectural and historical importance through evaluation and documentation. All properties located within the project boundaries were surveyed and documented with photographs and basic physical descriptions. Properties were then evaluated to determine if they qualified as contributing properties within the proposed district.

Survey area

The survey area was defined by the City to include properties located south of Van Dorn Street within the proposed historic district boundary. Generally, the survey area is bounded by Woodsdale Boulevard on the west; Van Dorn Street on the north; Winthrop Road, Sheridan Boulevard, and East Summit Boulevard on the east; and High and Laurel Streets on the south (see Figure 1). Properties fronting West Summit, South Summit, and East Summit Boulevards consist of a concentration of late c.1950s to c.1970s Ranch style houses that do not conform with the overall sense of the proposed district. As a result, they were omitted from the survey with the approval of the City.

Evaluation

During the field survey, architectural historians drove known public streets and documented all properties located within the survey area. All properties located within the survey area were evaluated individually and collectively for the potential to contribute to the proposed Boulevards Historic District. Historic districts include concentrations of related buildings, structures, sites, and objects that are important representatives of historic and/or architectural themes. Within potential historic districts, resources are considered either contributing or noncontributing.

Contributing: Resources in a district which are generally more than 50 years old, maintain a sufficient level of integrity, and represent the important historic and/or architectural themes of the district.

Noncontributing: Resources in a district that do not meet the 50-year guideline or do not maintain a significant level of integrity to represent the important historic and/or architectural themes of the district.

Documentation

Architectural historians documented all properties located in the survey area as outlined in the *NeHBS Manual* and according to the specific requirements of the Lincoln CLG. Photographic documentation included two black-and-white photographs and digital images of each property, with representative streetscape views to demonstrate notable features within the survey area.

Products submitted to the City include the survey findings report, black-and-white photograph contact prints and negatives, digital images, and a NeHBS database.

National Register of Historic Places

The National Register is the official federal list of districts, sites, buildings, structures, landscapes, and objects significant in American history, architecture, archaeology, engineering, and culture. A property can be significant at the local, state, or national level. To qualify for listing in the National Register, properties generally must be at least 50 years old, possess historical or architectural significance, and retain physical integrity.

To be listed in the National Register, a property's significance must be demonstrated by one or more of the following National Register criteria for evaluation established by the National Park Service (NPS):

- *Criterion A* – Association with events or activities that have made a significant contribution to the broad patterns of our history.
- *Criterion B* – Association with the lives of persons significant in our past.

- *Criterion C* – Association with the distinctive characteristics of a type, period, or method of construction, or represents the work of a master, possesses high artistic values, or represents a significant and distinguishable entity whose components may lack individual distinction.
- *Criterion D* – Holds the potential to provide important information about prehistory or history.

Cemeteries, birthplaces, gravesites, religious properties, moved buildings, reconstructed properties, commemorative properties, and properties that have achieved significance within the last 50 years are usually considered ineligible for listing in the National Register. However, these properties may qualify if they fall into one of the following categories:

- Religious properties deriving significance from architectural or artistic distinction or historical importance.
- Moved properties that are significant for architectural value.
- Birthplaces or gravesites if there is no other appropriate site directly associated with a significant person's productive life.
- Cemeteries that derive primary significance from graves of persons of transcendent importance, from age, distinctive design features, or from association with historic events.
- Reconstructed buildings when built in a suitable environment.
- Commemorative properties with significant design, age, tradition, or symbolic value.
- Properties less than 50 years old that are of exceptional importance.

Integrity, meaning the ability of a property to convey its significance, is important in determining the eligibility of a property. A property's integrity must be evident through physical qualities, including the following:

- | | |
|-------------|---------------|
| – Location | – Workmanship |
| – Design | – Feeling |
| – Setting | – Association |
| – Materials | |

Survey results

Three hundred eighty-four residential properties located south of Van Dorn Street within the proposed district boundaries were surveyed. See the Appendix for a complete list of surveyed properties.

Houses in the survey area are predominantly Colonial and Tudor Revival mixed with a combination of Chateausque, Spanish Renaissance Revival, Italian Renaissance Revival, Craftsman, Prairie, vernacular, and Ranch styles, which add stylistic variety. Houses are set back from the streets and mature trees line the sidewalk terrace and front lawns.

Recommendations

The purpose of the NeHBS survey of this portion of the proposed Boulevards Historic District is to collect reconnaissance-level information for the previously unsurveyed properties and to define future National Register historic district boundaries. National Register listing is an honorific status given to districts and individual properties that possess historic or architectural significance at the local, state, or national level.

As a result of this survey, Mead & Hunt recommends that the City proceed with a National Register Nomination for the overall Boulevards Historic District. The district is eligible for the National Register under *Criterion C: Architecture* as a cohesive concentration of intact early and mid-twentieth century houses. Despite the variation in architectural styles, houses in the proposed district are compatible in size and massing and feature similar setbacks and landscaping. The district should also be evaluated for Local Landmark eligibility.

West side of South 25th Street, within the defined survey area.

Three hundred seventy-six of the 384 properties located within the survey area were identified as contributing resources. These properties are more than 50 years old, maintain sufficient integrity, and reflect architectural themes consistent with properties located north of Van Dorn Street. At this time, eight properties have been identified as noncontributing since they did not meet the National Register's 50-year old guideline. These properties should be reevaluated at the time the nomination is prepared, as they may have reached 50 years of age.

The proposed boundary south of Van Dorn Street was reevaluated as part of this survey. Mead & Hunt recommends that the southern district boundary be extended to incorporate properties located south of Laurel Street between South 29th Street and South 31st Street. Houses in this area are compatible with the historical and architectural theme of the proposed district. Constructed between 1900 and c.1956, the houses display architectural styles consistent with properties located within the defined historic boundaries, such as Colonial and Tudor Revival, and are comparable in size and massing. The revised southern boundary would include all properties fronting South 29th and South 30th Streets between Laurel

and Sherman Streets, and properties fronting South 31st Street between Sherman Street and the vacated Hillside Street (see Figure 2).

Mead & Hunt recommends that the eastern district boundary be revised to exclude properties fronting West Summit, South Summit, and East Summit Boulevard and Sheridan Boulevard (see Figure 2). Houses located in this area do not convey the historical and architectural theme of the proposed Boulevards Historic District, due to their late date of construction and Ranch-style architecture. The revised eastern boundary would include properties fronting Woodsdale Boulevard between South 31st Street and Sheridan Boulevard and properties located on the east side of Sheridan Boulevard, terminating at the south lot line of 3230 Sheridan Boulevard.

The district boundary north of Van Dorn Street was previously defined and not evaluated as part of this project.

Additional intensive-level research and review by the Nebraska State Historic Preservation Office (NeSHPO) and the Lincoln CLG are recommended before pursuing National Register designation for the Boulevards Historic District.

These residences on South 31st Street are compatible with the overall historic district (these extended beyond the defined survey area).

This portion of South 31st Street includes residences that contribute to the overall historic district (these extended beyond the defined survey area).

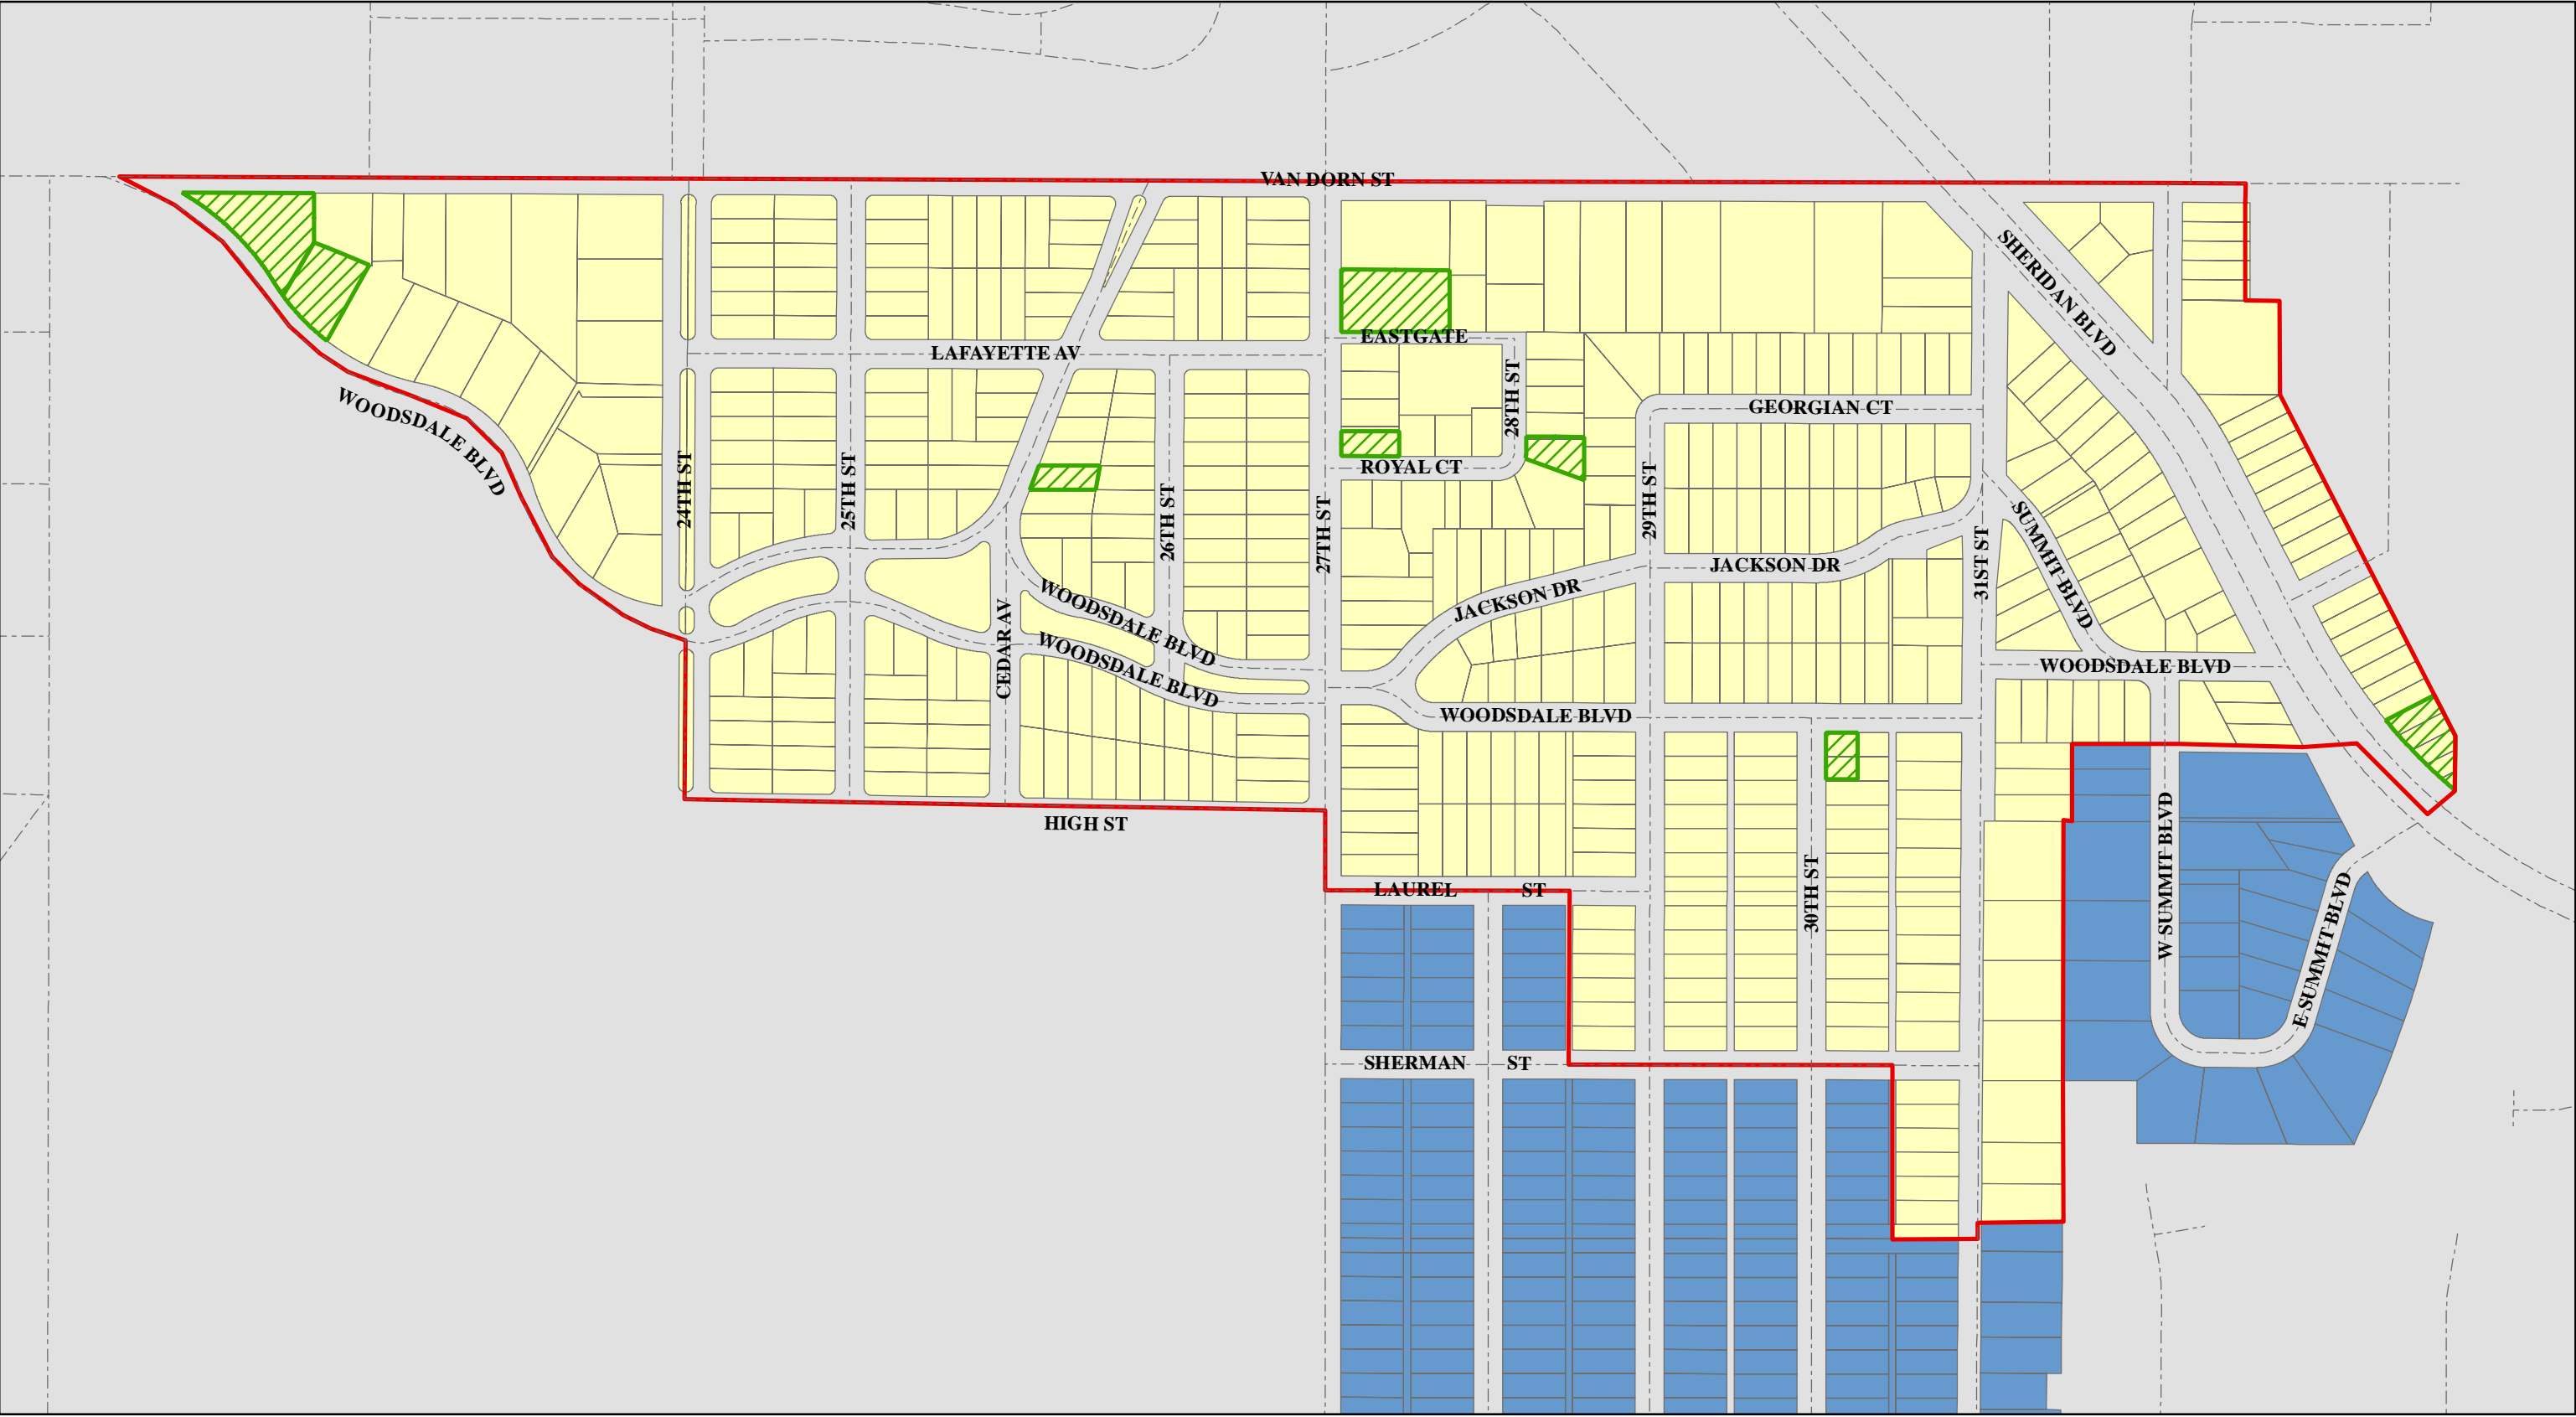

FIGURE 2.
PROPOSED BOULEVARDS HISTORIC DISTRICT BOUNDARY -
SOUTH OF VAN DORN STREET
 Lincoln, Lancaster County

Data Source: Lincoln - Lancaster County Planning Department

Due to the numerous examples of high-style architecture in the proposed Boulevards Historic District, a property must be highly intact and serve as an excellent representative example of an architectural style to be considered individually eligible for the National Register. The following four properties are recommended as potentially individually eligible for the National Register under *Criterion C: Architecture*. Further intensive-level research may reveal that additional properties are eligible under *Criterion A: History* or *Criterion B: Significant Person*.

Italianate Renaissance Revival House, 2430 Lafayette Avenue, LC13-0901202006000.

Colonial Revival House, 2810 South 27th Street, LC13-1606100013000.

Chateausque House, 2929 Van Dorn Street LC13-1606100006000.

Spanish Renaissance Revival House, 2905 Georgian Street, LC13-1606105009000

Preservation in Nebraska

Throughout much of Nebraska's history, historic preservation was the province of dedicated individuals and organizations working alone in local communities. Since the passage of the National Historic Preservation Act of 1966, however, the governor of each state has been required to appoint a State Historic Preservation Officer (SHPO) to oversee preservation efforts mandated by the Act. In Nebraska, the Director of the Nebraska State Historical Society (NSHS) serves as SHPO. The staff of the NSHS' Historic Preservation Division forms the NeSHPO.

The NeSHPO administers a wide range of preservation programs. The duties of the NeSHPO relating to programs called for by the National Historic Preservation Act include the following:

- Conducting and maintaining a statewide historic building survey.
- Administering the National Register program.
- Assisting local governments in the development of historic preservation programs and certification of qualifying governments.
- Assisting federal agencies in their responsibility to identify and protect historic properties that may be affected by their projects.
- Administering a federal tax incentives program for the preservation of historic buildings.

In addition to these duties, Nebraska has a state-sponsored financial incentive for preservation called the Valuation Incentive Program, which the NeSHPO administers.

What follows is a brief description of NeSHPO programs, followed by a staff guide with telephone numbers. Though described separately, it is important to remember that NeSHPO programs often act in concert with other programs and should be considered elements of the NeSHPO mission and a part of the mission of the NSHS.

Nebraska Historic Buildings Survey

The NeHBS was begun in 1974. The survey is conducted on a county-by-county basis and currently includes more than 69,000 properties that reflect the rich architectural and historic heritage of Nebraska. The survey is conducted by researchers who drive every rural and urban public road in a county and record each property that meets certain historic requirements. Surveyors do not enter private property without permission. In addition to this fieldwork, surveyors research the history of the area to better understand their subject. The NeHBS often includes thematic subjects that may be unique to a certain county such as a historic highway or type of industry.

The purpose of the NeHBS is to help local preservation advocates, elected officials, land-use planners, economic development coordinators, and tourism promoters understand the wealth of historic properties in their community. Properties included in the survey have no use restrictions placed on them, nor does the survey require any level of maintenance or accessibility by property owners. Rather, the survey provides a foundation for identifying properties that may be worthy of preservation, promotion, and recognition within a community.

The NeHBS provides a basis for preservation and planning at all levels of government and for individual groups or citizens. Generally, the NeHBS includes properties that convey a sense of architectural significance. When possible and known, NeHBS also describes properties that have historical significance. The survey is not intended to be a comprehensive history of a county, but a detailed “first look” at historic properties. Additionally, because the NeHBS is in part federally funded, the NeSHPO must use federal guidelines when evaluating and identifying historic properties. In short, the NeHBS is not an end in itself, but a beginning for public planners and individuals that value their community’s history.

For more information, please call the Survey Coordinator listed below.

National Register of Historic Places

One of the goals of the NeHBS is to help identify properties that may be eligible for listing in the National Register. The National Register is our nation’s official list of significant historic properties. Created by the National Historic Preservation Act of 1966, the National Register includes buildings, structures, districts, objects, and sites that are significant in our history or prehistory. These properties may reflect a historically significant pattern, event, person, architectural style, or archaeological site. National Register properties may be significant at the local, state, or national levels.

Properties need not be as historic as Mount Vernon or architecturally spectacular as the Nebraska State Capitol to be listed in the National Register. Local properties that retain their physical integrity and convey local historic significance may also be listed in the National Register.

It is important to note what listing a property in the National Register means or, perhaps more importantly, what it does not mean. The National Register does not:

- Restrict, in any way, a private property owner's ability to alter, manage, or dispose of a property.
- Require that properties be maintained, repaired, or restored.
- Invoke special zoning or local landmark designation.
- Allow the listing of an individual private property over an owner’s objection.
- Allow the listing of a historic district over a majority of property owners’ objections.

- Require public access to private property.

Listing a property in the National Register does the following:

- Provide prestigious recognition to significant properties.
- Encourage the preservation of historic properties.
- Provide information about historic properties for local and statewide planning purposes.
- Help promote community development, tourism, and economic development.
- Provide basic eligibility for financial incentives, when available.

For more information, please call the National Register Coordinator listed below.

Certified Local Governments

An important goal of the NeSHPO is to translate the federal preservation program, as embodied by the National Historic Preservation Act, to the local level. One element of this goal is to link local governments with a nationwide network of federal, state, and local organizations. One of the most effective tools for this purpose is the CLG program. A CLG is a local government, either a county or municipality that has adopted preservation as a priority. To become a CLG, a local government must:

- Establish a preservation ordinance that includes protection for historic properties at a level the community decides is appropriate.
- Promote preservation education and outreach.
- Conduct and maintain some level of a historic building survey.
- Establish a mechanism to designate local landmarks.
- Create a preservation commission to oversee the preservation ordinance and the CLG program.

The advantages of achieving CLG status include the following:

- A CLG is eligible to receive matching funds from the NeSHPO that are unavailable to non-CLGs.
- Contributing buildings within local landmark districts may be eligible for preservation tax incentives (see below), without being listed in the National Register.
- Through the use of their landmarking and survey programs, CLGs have an additional tool when considering planning, zoning, and land-use issues relating to historic properties.

- CLGs have the ability to monitor and preserve structures that reflect the community's heritage.
- CLGs have access to a nationwide information network of local, state, federal, and private preservation institutions.
- Finally, but not least, a CLG through its ordinance and commission has a built-in mechanism to promote pride in, and understanding of, a community's history.

Certification of a local government for CLG status comes from the NeSHPO and the NPS, and there are general rules to follow. A community considering CLG status, however, is given broad flexibility within those rules when structuring its CLG program. The emphasis of the CLG program is local management of historic properties with technical and economic assistance from the NeSHPO.

Lincoln Certified Local Government and Historic Preservation Commission

The Lincoln Historic Preservation Commission was established by vote of the City Council in 1980 and was accorded CLG status in 1985. A chief responsibility of a CLG is to maintain a survey of local historic properties and local history research. The survey gathers data related to the City's historic resources. A survey defines the historic character of a community or particular area and can provide the basis for making sound judgments in local planning.

Since becoming a CLG, 11 areas have been designated as Local Landmark and/or National Register districts and approximately 90 individual properties, sites, or structures have been designated as Local Landmarks or listed in the National Register. These range from a locally built locomotive to a 150-acre cemetery and 500-acre park.

The CLG also participates in extensive outreach and educational efforts to diverse audiences and supports redevelopment and rehabilitation activities in areas such as the Haymarket District and the Historic Downtown.

Federal project review

Section 106 of the National Historic Preservation Act requires that federal agencies take into account the effect of their undertakings on historic properties; develop and evaluate alternatives that could avoid, minimize, or mitigate adverse effects their projects may have on historic properties; and afford the federal Advisory Council on Historic Preservation an opportunity to comment on the project and its effects on historic properties. The regulations that govern the Section 106 process, as it is known, also require that the federal agency consult with the NeSHPO when conducting these activities.

For example, if the Federal Highway Administration (FHWA), through the Nebraska Department of Roads, contemplates construction of a new highway, FHWA must contact the NeSHPO for assistance in determining whether any sites or structures located in the project area are listed in, or eligible for listing in, the National Register. If properties that meet this criteria are found, the FHWA must consult with the

NeSHPO to avoid or reduce any harm the highway might cause the property. Note that a property need not actually be listed in the National Register to be considered for protection, only to have been determined eligible for listing. This process is to take place early enough in the planning process to allow for alternatives that would avoid adverse effects to historic properties; i.e., in the example above, the modification of a new highway's right-of-way could avoid an archaeological site or historic barn.

It is important to note that public participation in this process is vital. The Section 106 process requires the federal agency to seek views of the public and interested parties if adverse effects to historic properties are discovered through consultation with the NeSHPO. The NeSHPO examines information provided by the federal agency, the NeHBS, and the National Register; but often the most valuable information comes from comments provided by the public. Section 106 was included in the National Historic Preservation Act to protect locally significant historic properties from unwitting federal action.

For more information about Section 106 review, please contact a member of the Federal Agency Review staff of the NeSHPO listed below.

Preservation tax incentives

Since 1976 the Internal Revenue Code has contained provisions offering tax credits for the certified rehabilitation of income-producing historic properties. Historic properties are defined as those listed in the National Register, or as buildings that contribute to the significance of a National Register or a locally landmarked historic district. An income-producing property may be a rental residential, office, commercial, or industrial property. Historic working barns or other agriculture-related outbuildings may also qualify.

A certified rehabilitation is one that conforms to the *Secretary of the Interior's Standards for Rehabilitation and Guidelines for Rehabilitating Historic Buildings*. The standards are a common sense approach to the adaptive reuse of historic buildings. It is important to remember that this program promotes the rehabilitation of historic properties so that they may be used to the benefit and enjoyment of the property owner and a community. The program is not necessarily intended to reconstruct or restore historic buildings to exact, as-built specifications.

The tax incentive program in Nebraska has been responsible for the following:

- Reinvesting millions of dollars for the preservation of historic buildings.
- Establishing thousands of low- and moderate-income housing units and upper-income units.
- Encouraging the adaptive reuse of previously under or unutilized historic properties in older downtown commercial areas.
- Helping to broaden the tax base.

- Giving real estate developers and city planners the incentive to consider projects in older, historic neighborhoods.
- Helping stabilize older, historic neighborhoods.

Certification of the historic character of the income-producing property (usually by listing the property in the National Register) and certification of the historic rehabilitation is made by both the NeSHPO and the NPS. Before initiating any activity for a project that anticipates the use of preservation tax credits, owners should contact the NeSHPO and a professional tax advisor, legal counsel, or appropriate local Internal Revenue Service office.

For more information, please call the Preservation Tax Incentives Coordinator listed below.

Valuation Incentive Program

The Valuation Incentive Program (VIP) is a property tax incentive that assists in the preservation of Nebraska's historic buildings. Through the valuation preference, the *assessed valuation* of a historic property is frozen for 8 years at the year rehabilitation is begun. The valuation then rises to its market level over a period of 4 years.

To be eligible for this state tax incentive, a building must:

- Be a qualified historic structure, either by listing in the National Register or by local landmark designation through an approved local ordinance.
- Be substantially rehabilitated, which means the project must be worth at least 25 percent of the property's base-year assessed value.
- Be rehabilitated in accordance with the Secretary of the Interior's *Standards for Rehabilitation and Guidelines for Rehabilitating Historic Buildings*.

Buildings *must* be a qualified historic structure and the NeSHPO must approve the rehabilitation before construction work starts in order to qualify for the tax freeze benefits.

The tax freeze benefits the owners of the historic properties and the community by:

- Providing a real economic incentive to rehabilitate historic buildings.
- Increasing the long-term tax base of a community.
- Helping stabilize older, historic neighborhoods and commercial areas.
- Encouraging the promotion, recognition, and designation of historic buildings.

- Allowing participation by local governments that enact approved historic preservation ordinances.

For more information about VIP, please contact the NeSHPO at the contact numbers listed below.

Public outreach and education

The primary function of the NeSHPO is to assist communities in preserving significant buildings, sites, and structures that convey a sense of community history. The most powerful tool available to the NeSHPO in this regard is public education. For this reason, NeSHPO staff spend considerable time conducting public meetings and workshops and disseminating information to the public.

The NeSHPO's goal is to assist local individuals, groups, and governments understand, promote, and preserve historic properties. The NeSHPO advocates not only the self-evident aesthetic advantages of historic preservation, but also the potential for preservation to help promote economic development, community planning, tourism, environmental sensitivity, and land-use planning.

The above short descriptions are meant to orient the reader to the NeSHPO programs within the larger mission of the NSHS. As all NeSHPO programs originate from a common source – the National Historic Preservation Act – they work best when they are used together, either in whole or in part. For the programs to function at all, they require the interest and participation of the people they are meant to serve . . . the public.

For more information about the NeSHPO or the programs described above, please call (402) 471-4787 or 1-800-833-6747. Information is also available at the NSHS web page at www.nebraskahistory.org.
